

## Our Vision

### To be the world's leading provider of Research & Therapeutic Proteins.

#### Overview

Feldan Inc is a global biopharmaceutical company that Discovers, Develops, Manufactures and Markets Innovative Products and Solutions for the life science industry. Our Research and Therapeutic Products & Services enable our customers to achieve breakthrough life-science discoveries and improve human conditions.

The company has several Point-of-Sales offices around the world to support its sales, marketing & distribution activities. Our primary Research and Production facilities are located in Quebec City, Canada.

#### Products & Services

Feldan is organized around two main business segments - Research Proteins and Therapeutic Proteins.

- **THE RESEARCH PROTEIN SEGMENT** of the company discovers, develops, manufactures, and markets one of the world's broadest and most diversified research portfolios and custom protein-related services. It possesses leadership in virtually all key high-growth research areas.

In addition, the company also manufactures and markets hundreds of molecular biology kits used to isolate, manipulate and amplify DNA.

- **THE THERAPEUTIC PROTEIN SEGMENT** of the company develops and licenses therapeutic proteins that are the generic equivalent of brand biopharmaceuticals that no longer enjoy patent protection.
